SP16.RISD.GD

Newly Christopher 1:10-6:10pm FormedSleboda

This course focuses on advanced composition in Graphic Design and Typography using an array of materials, techniques and formats. Form remains an area of study in graphic design that does not need an application, only a surface. Emphasis will be placed on experimental form-making/image-making using generative and iterative approaches. Form need not follow function. Studio assignments are supported by lectures showing contemporary graphic form, from historical to contemporary work, that are effective and evocative. This elective aims to build a collection of work that can be shared with the larger graphic design community. New!. Chris is co-founder of Draw Down Books

Computationent 11:20am-4:20pm Technologya

and & Car This course addresses computation in art and responsive systems; 3) collective and open systems; and 4) computational thinking throughout the historical continuum of art and design. The course will emphasize canonical computational texts. Students will respond with self-directed and collaborative projects in the medium of computer programming. The final project is understood as a micro-thesis that will draw from students' ongoing work and/or disciplinary bodies of knowledge. Experience in at least one of the following programming languages is required: Processing, Javascript, MaxMSP, Pure Data, C++ or Python. Coding as a technology with associated implications to craft and authorship will be explored through a pedagogy of code sharing and collaborative learning. Differences in programming cultures across languages and disciplines will be one of the motive forces in this course, which is enthusiastically open to all majors. Relatedly, this course will use a parallel lecture series component to draw from perspectives outside

Poster Tom Design Wedell

of the RISD community. New!

This course will focus on the poster as a means of expressing a strong point of view. It will advance your experience with twodimensional form, and address critical relationships between type, image, and message at a large scale. The studio assignments will be supported with lectures about the history of the poster, international contemporary poster design, and future possibilities and contexts for the poster

Mappin gouglass Informationtt

The visualizing of information into graphic form is one of the oldest forms of graphic design, and is one of the essential areas of professional design engagement. This course deals with the organization and analyzation of data, and the concepts and methods of visualizing information. Using information structure and visual systems of form, color, and typography, students will work projects which communicate complex information through the use of maps, graphs, charts, and diagrams. These projects will explore issues of mapping, hierarchy, location, time, comparison, motion, format, and the use of

symbolic visual language.

1:10-6:10pm

New! Expected by Feb 1

Workshop will be run in Co-Works giving

students access to the latest production tools.

Book Jan Structuresker

Exhibit Douglass

Design Scott

1:10-6:10pm

This workshop covers various traditional and non-traditional bookbinding. Both form and content, as well as type and image, will be discussed, as students design, print and bind their own books. Aspects of layout, typography, paper and book production will be covered, in addition to instruction in pop-up book structures, sewn and glue binding.

Damn Swinehart Lies and Data

Christian 1:10-6:10pm

Charts and graphs have an indisputable aura of objectivity and yet, much like statistics, they can use this power to either elucidate or mislead. What makes an information graphic 'trustworthy' and how do designers know that their work is telling the 'whole story'? In this course we will deal with the mechanics of collecting & processing data from the local environment and the larger world. Eschewing the expected line graphs and pie charts, students will explore different ways of communicating the data's meaning in a quantitatively rigorous and visually engaging way. Projects will involve the use of scripting languages, web scraping, databases, and other numerical tools to transform data into something that is understood rather than simply 'seen'. EditoriaDylan

Design Greif How can you draw on your foundations in graphic design to make reading experiences Screen for the screen? What aspects of the craft translate, and what needs fresh exploration? This class covers basic HTML/CSS, wireframes, and flow diagrams, but it is not about "designing and coding a website." Students will learn to compose dynamic forms, ell engaging stories, and make meaning in igital environments. After experimenting vith a series of form-led studies, the course urns to narrative design on screen. What are he components of a story? What are the

needs and expectations of digital readers/viewers, and how can we design reading experiences that both serve and stir em? Where is the overlap between reader experience and user experience, between graphic design and product design? The semester's work not only engages the challenges that editorial web designers and digital storytellers in the industry face today, but asserts that designers should continue to re-think and re-assert their practice, whatever the future brings. New! Dylan is design director of Atavist

1:10-6:10pm

Type Franz

lmage Motion We stand firmly planted in a visual world, surrounded by a universe of things to look at. Images flicker from televisions, iPads, omputer monitors and more-as large as owering billboards and as small as compact cell phones. Such images provide us with clues about our environment, feeding our mind with <mark>af</mark>ormation that we find useful for survival or for orientation purposes. But these very same images clutter the horizon and prevent us from liscerning what is truly important. How do we ell them apart? The primary goal is to equip students with the skills necessary to create meaningful and intelligent images. Course content is tailored for three levels of experience - introductory, intermediate and advanced. Some of the class projects include documentary photography, film title design nd music video. The works of Saul Bass, Bill iola and Michel Gondry will be used as the textbooks" for this course. Readings, film creenings and listening exercises accompany studio work. Some knowledge of Adobe Flash

or After Effects or Final Cut Pro would be

helpful but is not required. See student work

GraphicAndrew 1:10-6:10pm

Design is a crucial element in making a website that is accessible, exciting and effective. This course will look at ways of using fundamental graphic design principles and site design tools necessary to create sites that are strategic, interactive, energetic and visually imaginative. This course will also explore the rich history of designers, artists, and collectives that have used the web as a medium in various ways from neen sites to tumblers to 4chan to wordpress to flickr, looking for interesting, novel and alternative approaches to web esign. Note new instructor. See Andrew's

Grad. 1:10-6:10pm

Visiting

Designers

Γ<mark>h</mark>is graduate-only Visiting Designers course provides contact with the visiting designers in four intensive workshops over the 12-week semester. The course objective is to provide graduates contact and interactions with national and international designers involved in a range of professional practice and public discourse of graphic design. While the emphasis is on typography and print, these designers actively explore a range of visual form. Each workshop will consider what provokes, inspires, and informs your working methods, and the role that "publication" plays in the communication of your ideas. Each session begins with a Thursday evening lecture, a Friday afternoon through Saturday

workshop, and a Sunday midday critique.

Web John Programming ta

1:10-6:10pm

This workshop combines the tactical skills needed to structure web pages with a looser more playful compositional mindset. Students are introduced to the structural elements and properties of HTML and CSS through handson demos and take-home assignments. Tight technical HTML drawings in week one give way to looser, full-screen abstract compositions in week two. Weeks three and four make use of animation and interactivity using CSS3 and jQuery. Class site from 2015

Print Ryan Waller to Screen

1:10-6:10pm

This course will investigate the unique challenges graphic designers face working across print and digital interfaces, and the opportunities for these spaces to have a dialogue with each other. Students will develop strategies for creating coherent visual and conceptual relationships that bridge this divide. How can responsiveness translate to print? What is the digital equivalent of a french-fold binding? Can a website be a timecapsule? Can a book be refreshed? Available in Web Adviser closer to Dec 1. Ryan is a partner at Other Means

Type Richard **Design Lipton**

11:20-4:20pm

This course is an overview of the basic principles of type design. The focus is on negative space, words, and readability. Students will gain a deeper understanding of typography and increased insight into existing typefaces. Richard is a senior designer at Font Bureau

Design Ernesto Aparicio Publishing

This course will cover all aspects of designing comprehensive art and photographic books. We will examine the use of type in layouts, editing images, grids, scale, and pacing. Particular attention will be paid to certain elements of design production, including the visual, tactile, and aesthetic qualities of paper, printing, binding, color separation, and advanced techniques in reproduction, namely duotone and three-tone in black and white photography. In the first part of the semester students will design the layout and the corresponding dust jacket for a photographic book. The material will include a number of original black and white photographs from one of the very well known French photographers. In the second part of the semester, students will be given the choice between designing a book based on their own interests and

completing a book design project using

assigned material.

1:10-6:10pm

Narrative ammett Design Nurosi

ın Motion

In this studio, the first question raised is also the most complex: what qualifies a string of events as visual narrative discourse? This studio explores this question with assignments that increase in formal complexity throughout the semester: progressing from traditional type and image forms to more complex installations involving video arts, sound motions, film titles, web design, environmental and public art installation, logos, music clips and billboard animations. Students will learn to think kinetically, with ideas and projects that enhance communication and artistic voice. The studio also introduces principle theories of narrative discourse and sign systems. New!

Claudia Simulationsola

1:10-6:10pm

This workshop is a hands-on experience where students will learn how 3D modeling is beneficial in conceiving, prototyping and presenting dimensional work. Graphic designers are increasingly using 3D modeling to plan and represent designs intended for exhibits, environmental graphics and signage This workshop brings the necessary software and conceptual fluency to help designers make work in 3D. These designs may influence 2D deliverables as well as those intended for the built environment. Students will learn Rhinocerous for Mac. No prior experience required. To be listed by Dec 1
